

Gule Position1

ZCOUGH
SOFT CAPSULES 100 MG

Prescription Only

[Formulation]
Each soft capsule contains: Benzonatate 100mg

[Excipients]
Gelatin 160, Glycerin, Purified Water

[Pharmacology]
Benzonatate Alvogen Soft Capsules 100mg is a non-narcotic oral antitussive agent. Benzonatate Alvogen Soft Capsules 100mg acts peripherally by anesthetizing the stretch receptors located in the respiratory passages, lungs, and stretch receptor on pleura by dampening their activity and thereby reducing the cough reflex at its source. It begins to act within 15 to 20 minutes and its effect for 3 to 8 hours. It has no inhibitory effect on the respiratory center in recommended dosage.

[Indication]
For the symptomatic relief of cough.

[Contraindications]
Hypersensitivity to benzonatate or related compounds.

[Warnings and Precautions]

1. Children below age 14 and those who have difficulty swallowing should not use.
2. Active ingredient release from the capsule in the mouth can produce a temporary local anesthesia of the oral mucosa and choking could occur. Swallow whole. Do not chew.
3. Pregnancy: It should be given to a pregnant woman only if clearly needed. (Animal reproduction studies have not been conducted.)
4. Nursing mothers: It is not known whether this drug is excreted in human milk. Close attention when administer.
5. Carcinogenicity, mutagenicity and reproduction studies have not been conducted.

[Side Effects]
Sedation, headache, slight dizziness, itching, rash, stuffy nose, constipation, nausea, gastrointestinal upset, burning eyes, fear of cold, chest pain, allergies have been reported.

[Overdosage]
No clear case has been reported. The drug is chemically related to tetracaine and other topical anesthetics and shares various aspects of their pharmacology and toxicology. Drugs of this type are generally well absorbed after ingestion.

[Toxic Symptoms]
If capsules are chewed or dissolved in the mouth, oropharyngeal anesthesia will develop rapidly, which may cause choking and airway compromise. Further central inhibition may lead to clonic spasm.

[Toxic Treatment]

1. Evacuate gastric contents and administer copious amounts of activated charcoal slurry. Even in the conscious patient, cough and gag reflexes may be so depressed as to necessitate

special attention to protection against aspiration of gastric contents and orally administered materials.

2. Convulsions should be treated with a short-acting barbiturate given intravenously and carefully titrated for the smallest effective dosage.
3. Intensive support of respiration and cardiovascular-renal function is an essential feature of the treatment of severe intoxication.
4. Do not use CNS stimulants.

[Dosage and Administration]
Adults: 1 – 2 capsules three times a day.

[How Supplied]
Bottle with 6 – 1000 capsules.

[Storage]
Store below 30°. Keep out of reach of children.

[Expiry Date]
Note the indicated expiry date.
